

**IN THE SPECIFICATION:**

Please amend the specification as follows:

Please add the following sentence after line 13 on page 6:

FIG. 2A is a block diagram of the circuitry of the apparatus according to another embodiment of the present invention;

Please amend the paragraph beginning on page 18 as follows:

With reference to FIG. 2A there is shown another embodiment of the present invention. In this embodiment, It is contemplated to provide the apparatus 10 is provided with an optical-to-RF conversion module 100 and transmission circuitry, as known in the art, for converting. In accordance with the present invention, the RF conversion module 100 receives an optical signal having audio content and converts it into an RF modulated signal. The RF modulated signal is then received by the frequency conversion module 22 for converting this signal transmitted audio received as an optically encoded signal including audio content into an RF modulated signal having a modulation frequency within the AM and/or FM band capable of reception by the AM/FM radio and stereo equipment as described above with reference to the embodiment shown by FIG. 2. The optical-to-RF conversion and transmission circuitry will transmission antenna then transmits the RF modulated signal to the AM/FM radio or stereo equipment, or a remote computing device for audible reproduction, as described above.
